

Alert Ambulance is now offering in-home monoclonal antibody (MABS) treatment

If you have tested positive for COVID-19, are age 12 or older, started having mild to moderate symptoms in the last 10 days, and are at high risk for progressing to severe disease, you may be able to get in-home MABS treatment.

**To learn if you qualify, call our in-home MABS treatment line at
401-862-6689**

Provide the following information when you call:

- Your relationship to the patient (patient, family member, caregiver)
- Confirmation of the patient's recent positive COVID-19 test
- Patient name
- Patient date of birth
- Patient phone number
- Address for treatment
- Patient insurance and self-pay information

Allow at least 24 hours between your request and service delivery.
